Unveiling the Chronicles  
of Quality Assurance!

# FUN FACT FRIDAY

Did you know that behind every glitch-free app and seamless software lies the epic saga of Quality Assurance? Let's dive into the quirky history that shaped our digital world, brought to you by QualiZeal!

## Fun Fact:

The term "bug" in software originated in 1947 when a moth got stuck in the Harvard Mark II computer. Grace Hopper herself extracted the bug, coining the term we use today!
